Allowable Subject Matter

Claims 1-56 allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The reference Schlumberger et al. with patent number 4,899,318 discloses and claims an invention similar to applicant's. However, a comparison of the claims, as set forth below, demonstrates the conclusion that the inventions are noninterfering.

Claimed invention features are "determining, on the basis of the positions of the shapes relative to the reference object, those shapes that have no chance of intersecting the ray, and those remaining shapes that may intersect the ray". And "pre-characterizing at least some vertices of at least some of the polygons to provide characteristic data that describes the vertices' positions relative to the reference object".

Conclusion
